

As part of our Fish Stocking Initiatives, the LCLPRD has entered into a sponsorship with *Walleyes for Tomorrow* for the purpose of executing an annual hatchery and stocking operation on Little Cedar Lake.

Hatchery operations will consist of a mobile hatchery trailer along with boats used for placement/retrieval of nets. While the equipment, knowledge and training will be provided by *Walleyes for Tomorrow*, the labor required to work the nets and operate the hatchery will need to be provided by volunteers.

We ask that anyone interested in helping secure a successful hatchery and healthy walleye population on Little Cedar Lake please consider volunteering.

To help kick-start this year's operation, *Walleyes for Tomorrow* will conduct a training session for all interested volunteers on Saturday, March 14<sup>th</sup> at 10:00 a.m. at the Town of West Bend Town Hall.

Please contact Mark Wagor [wagor1336@aol.com; (262) 808-3583] if you have any questions and/or are interested in volunteering.
